EDUCATION

Nairobi, Kenya

Jomo Kenyatta University

- Bsc in Computer Science.

WORK EXPERIENCE

Software Engineer

Solutech Ltd

Mar 2023 – Present

Nairobi, Kenya

- Spearheaded collaborative efforts with developers to swiftly identify and rectify software glitches, resulting in an impressive 70% reduction in support traffic.
- Played a key role in testing client-server network components, ensuring an exceptional 99.9% uptime for seamless operations.
- Orchestrated the continuous operation of the first-line support chat platform for 99% of working hours, consistently achieving a 100% clearance of the customer queue before the close of business.
- Pioneered the development of JavaScript and PHP libraries, empowering Solutech developers to generate reports with remarkable efficiency, slashing the development process by an outstanding 90%.
- Executed a strategic migration of the company's infrastructure from Digital Ocean servers to Google Kubernetes Engine (GKE) as a multi-tenant SAAS, resulting in a substantial 65% reduction in server costs.
- Demonstrated proficiency in conducting thorough code reviews, ensuring code quality and fostering a collaborative environment, contributing to a solid 90% collaboration rate.

Software Engineer

SasaPay Inc.

Jan 2022 – Feb 2023

Nairobi, Kenya

- Engineered an automated testing framework, slashing testing time by 80% and expanding test coverage by 60%.
- Led cross-functional teams to optimize application performance, achieving a remarkable 70% latency reduction and a 15% increase in user satisfaction.
- Architected backend features with Java, Spring Boot, Maven, NodeJS, and Hibernate, resulting in a 45% boost in application scalability, 25% performance enhancement, and 99.9% uptime.
- Innovated an Anti Money Laundering software, streamlining client onboarding with an extraordinary 98% reduction in the process.
- Actively contributed to agile practices, ensuring streamlined communication channels for enhanced service delivery efficiency and elevated client satisfaction.

Software Engineer

Patika Tech.(YC S22)

Aug 2018 – Dec 2021

Remote, Kenya

- Implemented cross-platform development strategies, slashing time to market by an outstanding 50%.
- Engineered and sustained customized solutions, leveraging programming tools, data processing logic, and meticulous documentation to streamline processes and enhance overall efficiency.
- Fostered robust client communication channels, resulting in a substantial improvement in service delivery efficiency and heightened client satisfaction.
- Produced clear, clean code adhering to best coding practices, fostering a remarkable 90% collaboration rate.

SKILLS & COMPETENCIES

- Java: Spring Boot, MAVEN, spring MVC, JDBC, Hibernate, JEE, Spring Cloud, Microservices
- PHP: Laravel, Symfony, CodeIgniter, Wordpress
- JavaScript: ReactJs, Angular2+, VueJs, NodeJs
- Cloud Computing: Google Cloud Platform(GCP), Amazon Web Services (AWS), Microsoft Azure, Digital Ocean, Section.io Platform
- DevOps: Infrastructure as Code (IaC) using Terraform, Jenkins, ArgoCD, Docker, Kubernetes, TeamCity, CircleCI, Git, Bamboo, JMeter, GitOps, SonarQube, Stash
- Databases: MySQL, PostgreSQL, Oracle Database, MongoDB, Microsoft SQL Server, Apache CouchDB, SQLite
- APIs: Restful APIs, SOAP, gRPC, GraphQL, Swagger UI, API Testing, Postman, Airborne
- Version Control Systems: Github, Gitlab, Bitbucket
- Testings: JUnit, Jest, Karma
- Data Structures & Algorithms: Linked Lists, Binary, Queue, HashMap.
- Agile Methodologies: Scrum, Jira, SDLC
- Telecommunication: Firewalls and security, Network Monitoring, Domain Name System (DNS), Scripting, Routers & Switches, Wireless & Wireline
- Enterprise Service Bus (ESB): Mobile Money, Value Added Service (VAS) solutions-USSD, SMS, Voice & Airtime, Tibco, Billing
- Python: Django and Flask Frameworks
- Ruby: Ruby on Rails Framework
- Go: Gin and Echo Frameworks
- Machine Learning: Deep Learning, Quantum
- Frontend Toolkits: Figma, Ionic, Single Page Applications (SPAs)

NOTABLE PROJECTS

- **Anti Money Laundering (AML)** (<https://www.kwestaml.com/>) An anti money laundering software used by SasaPay to on-board new customers to use mobile money services. Node Js, React Js, GCP, GraphQL, gRPC
- **Kenya Institute of Supplies Examination Board (KISEB)** (<https://students.kiseb.or.ke/>) A student portal to allow students to register and sit for their exams. Vue Js, Java, AWS, Microsoft Dynamics
- **Kogi State Government (Nigeria)** (<https://kogas.ng/>) Let citizens dive into what the government is doing and learn more about the development strides across Kogi State. Angular, Laravel, AWS

AWARDS

- **BEST STUDENT IN KCSE** (NYANG'IELA HIGH SCHOOL) Recognized for being the best student in Nyangiela. MAY 2017
