Profile

Experienced mechanical engineer with a demonstrated history of working as **retail director** in the oil & energy downstream industry. Skilled in negotiation, retail operating management, operation of distribution plants, business planning, budgeting, fuel assets M&A, sales, team building and management. Successful business development professional with a strong technical and commercial background.

Ability to work with and build up a multi-functional team in an international environment, leading it through several transformations we are currently facing in our industry, taking the current opportunities to develop new sustainable business focused on mobility services. This occurs through organization development activities, such as leadership development, strategic planning, financial planning and a different way of seeing this traditional market.

Working in France for the Italian Oil Company branch since 2017. Starting career in France as retail sales and operation director, reaching the key role of retail director and member of the steering committee in the 2021, achieving excellent results cooperating and leading the retail team composed of 32 members.

Work experience

07/2021 – present
Lyon, France

Head of retail business unit Eni France Sarl

Responsible for leading and developing the position of Eni retail business in the french market both from sales & marketing and operational perspective. In charge of thinking the retail long-term strategy. Leading through 7 direct reports managers, retail operations, investments and maintenance, development of highway and dodo points of sale, fuels cards sales, marketing, pricing and back-office. There are 32 direct employees all over the retail business unit and about 1,000 indirect reports employees working in the points of sale.

The assets distribution network consists of CODO and DODO offering multiple services such as restaurants, coffee corners, C-stores, car-washes and car repairs. The business that I manage in a few figures:

- 157 points of sale, 40 of which in the highway
- 310 TCM of fuels sold
- 80 M€ of non-fuel turnover
- 18 M€ of EBITDA.
