Process Engineer

Experienced and dedicated Process Engineer with over eight years of experience, a graduate of Chemical Engineering from the University of Benin, with great skills and proficiency in the use of software even on the Job. Broad knowledge process equipment such as Pumps, Valves, Boilers, Separators, Dryers etc.

Career Objective

Committed and Innovative person looking forward to promoting and contributing my personal skills and talents to a reputable organization that recognizes and encourages growth and Development.

EDUCATION

2008-2012	University of Benin, Benin City	Chemical Engineering (B.Eng)
2005-2007	University of Benin Benin City	Chemical Engineering (Diploma)
1998-2004	Christ The King International Secondary School, Warri	S.S.C.E. Certificate

PROFESSIONAL QUALIFICATION RECORDS

May, 2020	Udemy (WR Training)	Process Control and Instrumentation
Oct., 2017	Petroleum Training Institute (P.T.I), Warri	Quality Control/Quality Assurance
July, 2017	Demlong Foundation	Hysys- Process Design &Simulation
July, 2014	Veritas Computer Centre	AutoCAD 2D & 3D
Feb., 2014	Project Management Professional Institute	Level 3 of 3(QHSE & EIA)
Aug., 2013	Project Management Professional Institute	Level 2(HSE)

WORK EXPERIENCE(S)

O-SECUL Nigeria Limited, Warri

May, 2019 – Till Date

Process Engineer

Knowledge Acquired and Job Description:

- Performed Hazard and Operability Studies to identify Process Hazards
- Preparation of Operating procedure and Operating instructions
- Selection of process schemes and process operating philosophy.
- Execution of all process calculations and simulations.
- Line sizing and equipment selection.
- Process Equipment Condition Monitoring and Optimization.
- Provide Process Design for Conceptual, Front-End & Detailed
- The use of ASPEN PLUS & HYSYS software for Process Modification Design and Simulation.
- The use of Microsoft Visio for PFD and AutoCAD 2D & 3D for Engineering Design and P&ID.
- Use of Microsoft Project Management software to prepare cost, resource catalogue for projects.
- In-depth knowledge of Microsoft Word, Excel, and Power Point

Uvwie Mills, Warri

May, 2016 – April, 2019

Process Engineer

Knowledge Acquired and Job Description:

- Preparation and maintenance of process flow diagrams including heat and material balances
- Preparation and maintenance of process data
- Develop best practices to improve production capacity, quality and reliability.
- Preparation and maintenance of piping and instrument diagrams sheet.
- Monitoring of performance of equipment such as Boiler, Cooler, Mixer etc.
- Engineering activities including developing and analyzing process and design calculations, process optimization, sizing & specification of equipment using CHEMCAD.
- Ensure that the desired output is realized & the appropriate raw material quality and quantity is used

Global Steel Holdings Limited (Former D.S.C.), Warri

September, 2014 - February, 2015

Process Engineer – Lime Plant

Knowledge Acquired and Job Description:

- Monitor the conditions of control system, safety systems and alarms of rotary Kiln
- Evaluate current production activities and make recommendations for improvements.
- Implement cost reduction initiatives while maintaining high quality standards.
- Develop operating instructions and equipment specifications for production activities.
- Stay current with product specifications, engineering technology and production processes.
- Investigate problems, analyze root causes and derive resolutions.
- Planning and coordinating of production and manufacturing processes to produce quality products.
- Develop process improvements to effectively utilize equipment/materials to maximize production.
- Develop operational strategies to achieve production and financial objectives.
