CURRICULUM VITAE

- Project Management Professional, Certified by Project Management Institute-USA, Number 2282756
- Member of Project Management Institute- Uganda Chapter
- Member of the Uganda Institution of Professional Engineers(UIPE)
- Experienced in managing maintenance and multi-discipline projects
- Excel in collaborating with clients, contractors and government agencies to meet or exceed Project design, quality, time-line and budget expectations.
- Experienced in setting Environmental, Health & Safety standards and enforcing compliance for a safe work environment.
- SAP Plant Maintenance Module Global Trainer (Namibia, Morocco, Tunisia, Madagascar, Senegal, Mali, Ghana, Cote-divoire, Burkina-Faso, Benin, Cape-Verde & Uganda)

EXPERTISE

Project management: Highly competent in end-to-end project management processes, from initiation, planning, execution, monitoring & control to closing stages.

Leadership and teamwork: Throughout my career, I have worked with teams as both a Leader and a subordinate. That experience has enabled me to develop a competence in visionary leadership and teamwork, where I clearly communicate to the team members the deliverables and support them to achieve them.

Engineering Skills:

- Mechanical Engineering background with adequate knowledge for effective management of projects in Civil, Electrical and Electronics Engineering fields
- Skilled and trained in Health, Safety & Environment management for Zero Harm.
- Skilled in setting and driving good maintenance culture that would give the best output from machinery and the people.
- Trained in Facilities Management

Technical Tools: Ms Project, Auto-Cad, SAP Plant Maintenance, Ms Office packages and Ms Teams

PROFESSIONAL WORK EXPERIENCE

Project Manager Zambia-International Assignment:

Vivo Energy Africa (Shell License in Africa)

March 2021 ♦ Present

Key Responsibilities:

- To support business growth through expansion of the Retail Network
- Deliver all approved projects safely within agreed baselines of cost, schedule and scope
- Develop technical competency of the local engineering team
- Support in the preparation of project business cases and the Investment proposals
- Projects contracts management and administration
- Support contractors to improve their HSSEQ compliance
- Ensure Vivo Energy HSSE protocols are adhered to throughout project execution
- Project Progress Reporting

Summary of Key Achievements:

- Six new Retail Fuel sites(NTI) added to the Retail network of Zambia in 2021
- Delivered one full Retail Fuel Site Optimization-One site was knocked down and Rebuilt, fully upgraded with four island canopy, a Restaurant, Pharmacy, Shop & Bakery in 2021
- Delivered Eight Quick shops, Two Pharmacies, Four Tyre centers constructed in 2021. The business growth that resulted from these deliverables was nominated and **won the Annual Vivo Energy CEO Award in the category of Driving Forecourt Offering Award 2021.**

Engineering Projects Manager (Rwanda & Zambia)

Vivo Energy Africa (Shell License in Africa)

2020 ♦ February 2021

Key Responsibilities;

- To manage regional projects with the right Health, Safety, Security, Environment & Quality within scope, Budget and Agreed Schedule.
- Train Respective Country Engineering Teams to improve their technical competencies
- Coach and Mentor Technical team members

- Participate in Project Initiation phases
- Perform Technical review for Project prospects
- Support Country teams in prioritization of Projects
- Report project progress monthly to the Executive Management Team
- Support the country teams in performing Project Post Investment Review

Summary of Key Achievements:

- Did a Technical Feasibility study on the then proposed 9No Retail Fuel Stations that Vivo Energy intended to take over from competition in Zambia under a project dubbed Ngucha Project, managed the upgrade of those sites to Vivo Energy standards and in the end, the Nine Retail Fuel Stations(NTV) were added to the Vivo Energy Zambia Retail Fuel Sites Network. Given the excellent execution of this project, it was nominated and **won the Annual CEO Award 2020 in the Category of Change for Future Growth.**
- Did a Technical Feasibility study on the then proposed 16No sites that Vivo Energy intended to take over from Competition in Rwanda under a project name Rwanda Accelerate Growth Project, prepared required technical work scope to upgrade the sites to Vivo Energy standards, Evaluated the returned tenders and proposed contractor awards. **This project at completion won the Annual CEO Award in the category of Fuel & Lubes Growth Award 2021.**
- Onboarding & Training of Vivo Energy Rwanda's then new Projects Engineer in 2020
- Trained Vivo Energy Rwanda technical and Leadership teams in Engen Brand standards in 2020 to enhance their capabilities to work towards preserving and enhancing the Engen brand.

Project Engineer (Rwanda, Tanzania & Zambia)

Vivo Energy Africa (Shell License in Africa)

2019

Preamble: On 1st march 2019, Vivo Energy took over a network of Retail Fuel sites under the Engen Brand in eight countries in Africa, i.e. Zambia, Rwanda, Tanzania, Kenya, Gabon, Malawi, Re-union, Zimbabwe and Mozambique. However, many of the sites had been run-down and non-compliant to the Engen brand standards. I was therefore tasked with conducting a technical & brand assessment of all the retail fuel sites in Zambia, Rwanda and Tanzania and working with the various country Engineering teams to upgrade their respective Retail fuel sites to meet both Engen brand standards and Vivo Energy standards under a project dubbed Project Shine.

Key Responsibilities included;

- To manage Project Shine with the right Health, Safety, Security, Environment & Quality within scope, Budget and Agreed Schedule.

- Support the local Country Technical Teams to deliver the project while improving their competencies
- Report project progress monthly to the Vivo Energy Executive Management Team
- Support the country teams in performing Project Post Investment Review

Summary of Key Achievements:

- Technical and Brand Assessment of the then newly acquired Retail sites in Zambia, Rwanda and Tanzania. Complete with preparation of assessment reports and remediation actions.
- Supported the respective country teams to prepare work scope that would close all identified gaps, preparation of bills of quantities, tender process and work supervision. All sites in scope were then upgraded to both Vivo Energy standards and Engen Brand standards.

SAP PTM Plant Maintenance Trainer

Special Assignment to OPTIMA Project Implementation Team.

Vivo Energy Africa (Shell License in Africa)

2018

Preamble: Early 2018, Vivo Energy embarked on a journey to roll out a new Enterprise Resource Planning(ERP) system, SAP S4Hana, across its markets in Africa to better manage her operations for excellence under a project code named OPTIMA. The implementation of OPTIMA Project was phased as follows Wave1(Uganda & Kenya), Wave2(Madagascar, Namibia, Mauritius & Botswana), Wave3(Cote d'ivoire, Ghana, Senegal, Mali, Burkina-Faso, Guinea & Cape-Verde) and Wave4(Morocco and Tunisia).

Onboarding & Implementation:

In June 2018, I was nominated and on boarded on to OPTIMA project Implementation Team as a PTM Plant Maintenance Module Trainer for Trainers.

My role was to train the nominated Trainers from each of the respective countries that constituted a wave as scheduled from wave1, through to wave2, wave3 and to wave4. The PTM Plant Maintenance Module is one that would support the Vivo Energy business to keep a live up to date Asset Register and Efficiently manage both Preventive and Corrective Maintenance of all Vivo Energy Assets.

Success:

I successfully trained the Trainers who returned to their respective countries to train all teams that would work with the PTM Plant Maintenance Module, most especially the Engineers, Supply and Distribution teams, Retail & Commercial Teams. This contributed to the success of the OPTIMA project whose implementation exceeded expectation as declared by then Vivo Energy Africa CEO, Christian Chammas. By end of 2019, we had completed the roll out of SAP S4Hana in all the Vivo Energy Countries that constituted wave1(Go Live 1st September 2018), wave2(Go Live 1st March 2019), wave3(Go Live 6th May 2019) and wave4(Go Live 15th August 2019).

Head of Engineering

Vivo Energy Uganda (Shell License) 7th street industrial area- Kampala

March 2015 ♦ February 2019

Responsibilities:

- Prepare, monitor and control annual Operational expenditure, Maintenance and Growth Capex budgets
- To draw Investment Proposals, estimates, drawings, tender and contract documents, and purchase orders for Capex and maintenance projects
- Managing projects within budget, good quality and in compliance with HSSE requirements
- Monthly reporting/presentation on Capex position and manage capitalization of spend Capex.
- Planning and coordinating maintenance work at various sites,i.e. LPG, S&D and B&B sites in accordance with Group Standards and Procedures as well as best practices
- Drive full implementation of Pragma Asset Management System
- To manage, motivate and train both staff and contractors.
- Conducting HSSE audits and training
- Supporting procurement to pre-qualify contractors and also assess and measure contractor performance periodically.
- Prepare monthly capital spend forecasts.
- Support the engineering team to ensure compliance with legislation and all requirements of the HSSE MS and Group standards in all operational activities
- Ensure cost effective delivery of engineering services through the use of fit-for-purpose standards, and practices.
- Coach and mentor staff, including development of appropriate training programs.
- Ensures proper staffing through attraction, coaching and development of people, covering aspects like Competences, Performance Management and Recognition & Reward.

Summary of Key Achievements:

- Supported the growth of the Retail Fuel Sites Network of Uganda from 104No Sites in 2015 to 148No sites in 2019, thus growing the network by 42%. This was achieved through construction of new sites or upgrading sites that Vivo Energy took over from competition.
- Delivered Kampala Depot Expansion project in 2016, code named Project Tikka. This \$1.5m project was aimed at increasing the capacity of Kampala depot to meet Vivo Energy's growth strategy in Uganda. To achieve the project objectives, the following infrastructure was constructed to completion in line with Shell design Engineering standards; functional 3-Truck Bay Offloading Gantry, a 3-bay Truck Dipping Area, A Functional Office Building complete with a state of art Fuels Laboratory, Additional Functional 2No Loading Bay Gantry.
At completion, the offloading capacity increased to 44 Trucks per day.

- Doubled the LPG storage Capacity for Kampala Depot in 2016 and respectively increased stock holding days from 7 to 14days. This was done through scoping, sizing, sourcing for suppliers of a 207m³ LPG storage Tank (Silva Matos-Portugal) and its safe installation and commissioning. Project cost \$705k.
- Did an Upgrade of the LPG Filling Plant Structure at \$450k to meet the required minimum HSSE standards for such an operation and Subsequently Automated the LPG Cylinder Filling Line that was fully manual to cope with the growing demand for LPG gas. Work involved Construction of a fire proof structure to house the LPG Filling Line; Scoped, Designed, Sourced from FAS Germany an automated LPG Filling Line consisting of 6No Electronic Filling Scales, Electronic Check scale, Sorting Station, Automatic Leak Detection machine, Transport Conveyors, Sealing Machine amongst others which were all installed and commissioned in 2018.

Capital Expenditure Site Projects Manager

Uganda Breweries Limited, Luzira Port-Bell, Kampala (Member of Diageo Plc)

2010 ♦ 2014

Responsibilities:

- Ensuring that all engineering works are done in accordance to specifications, statutory requirements, laws, rules and regulations, and the binding contracts about safety, environment, usability and maintainability.
- Confirming and approval of possible variations in the contract during project execution
- Managing projects from conception, pre-production through to completion.
- Providing technical and moral support to the project team and supporting teams
- Preparation of tender documents, evaluation of returned tenders, negotiation for better deals, award of contract, supervision of project to completion, approval of contractor payment certificates.
- Incorporating required safety in tender documents, leading the generation of Environment Impact Assessment reports and submission into NEMA for approval.
- Management of work permits, supporting the generation of Risk Assessments and method statements, incident reporting and accident investigations.
- Leading the zero-harm agenda and ensuring all work is executed in total compliance to the Health, safety and environment standards a copy of which is always part of the contract document.
- Management of safety inductions for new contractors, welfare support initiatives at the work place and emergency response systems.
- Liaising with suppliers on a regular basis to ensure the successful design and manufacture of products to agreed specification, budget and time-frame.

Summary of Key Achievements:

- Upgraded and increased Brewing capacity for Uganda Breweries Limited to have adequate capacity to meet the growing demand for its beer products. The project involved work scoping, design, budgeting, tendering, contractor management on site, logistics management mostly for the new supplies from Germany, United Kingdom and Netherlands. This project required construction of new building structures to contain the new machinery such as Lauter tun, Dual Purpose Vessels(DPV), Blending Plant and Beer Centrifuge, complete with installation and commissioning. The project was completed safely in December 2012 and was at a budget of GBP 16Millions
- Refurbished the Anaerobic Waste Water Treatment Plant for Uganda Breweries Limited to ensure efficiency in treatment of waste water from the factory processes prior to being discharged into the environment.
The project involved generation of the scope of works, budgeting, sourcing for contractors, tender evaluation and award, logistics management for the new supplies shipped from Belgium(Waterleau), contractor management on site and overall health & safety management and communication with local authorities. Budget for the project was GBP 300,000 and it was completed August 2013.
- Constructed 820m² Warehouse for Uganda Breweries Limited to serve as storage for newly supplied glass prior to being used for packaging in the production lines. The project involved design, budgeting process and tendering process, contractor management on site, commissioning and handover. The project was completed in June 2013 and its budget was UGX 800m.
- Increased packaging capacity of Uganda Breweries Limited through installation of a new beer packaging line. A beer packaging line consisted of machines such as a 50,000bph Filler Machine, an Electronic Bottle Inspector Machine(EBI), Bottle Washer Machine, Pasteuriser Machine, Labeler Machine, Packer Machine, UnPacker Machine and series of linking conveyors. The project scope included work scoping, design, budgeting, tender process, supply and installation of new machinery and expansion of the production area. The project was delivered in 2011 as a success on Safety, Delivery time, Cost and Quality. Budget for the project was GBP 14m.
- Constructed 6400m² of concrete hard-stand for the storage of empty beer crates at Uganda Breweries Limited. The project involved work scoping, design, budgeting, tender process, contractor supervision, test and commissioning. This project was successful on safety, cost and quality and it was completed in April 2011 at a budget of UGX 2Billion

Operations Shift Manager

Uganda Breweries Limited, Luzira Port-Bell, Kampala (Member of Diageo Plc UK)

2008 ♦ 2009

Responsibilities:

- Managing a team of 25 people to deliver the business production plans through good planning of activities, routine maintenance of machinery, adherence to the Good manufacturing practices, ensuring safety of colleagues and efficient operation of machinery.
- In charge of all production related documentation and reporting, managing waste to reduce cost of goods sold, training & mentoring of colleagues, leading all continuous improvement initiatives and management of raw materials & spares

Summary of Key Achievements:

- Delivered production output that met the projected plan
- Majority of my team members upgraded their academic qualifications for brighter professional careers
- Delivered production Equipment Availability of not less than 90%

Operations Team Leader

Century Bottling Company Limited, Namanve, Mukono (Coca-Cola Franchise)

2006 ♦ 2007

Responsibilities:

Managing a team of 18 people to deliver the business production plans through good planning of activities, routine maintenance of machinery, adherence to the Good manufacturing practices, ensuring safety of colleagues and efficient operation of machinery

Summary of Key Achievements:

- Coached and mentored my team to deliver excellent performance during work.
- Reduced Equipment downtime and increased Equipment Availability to not less than 85% per month.

ACADEMIC QUALIFICATIONS

- Professional Certification in Project Management(PMP)- Project Management Institute, USA, 2019
 - Master of Business Administration(MBA), Heriot-watt University, Scotland, UK, 2012
 - Bachelor's degree in Mechanical Engineering, Makerere University, 2005
 - Certificate in Projects Management- APTECH Training Institute- Uganda
 - Certificate in Project Management, Heriot-watt University, Scotland, UK, 2011
 - Certificate in Strategic Planning, Heriot-watt University, Scotland, UK, 2011
 - Certificate in Financial Risk Management, Heriot-watt University, Scotland, UK, 2011
-

LIFE SKILLS

- Good communication, interpersonal skills and a team player with excellent problem solving skills.
 - Experienced driver with a clean driving permit
 - Social and out-going
 - Fluent in English, Basic knowledge in Swahili
-
