Objective

Results-driven and strategic-minded professional with a proven track record in corporate strategy and advanced analytics. I can leverage my experience in formulating and executing strategies while harnessing the power of analytics to drive data driven decision-making. Adept at translating complex data into actionable insights, I aim to contribute to organizational growth by aligning strategic initiatives with data-driven intelligence.

Experience

25 April 2022 – to date
Procurement Analytics Manager • Standard Bank Group

01 January 2021 – 30 October 2021
Senior Supply Chain and Network Operations Consultant • Deloitte Touche
Tohmatsu Services, Inc

08 January 2019 – 24 April 2022
Senior Audit Analytics Consultant • Deloitte Touche Tohmatsu Services, Inc.

01 September 2017 – 31 December 2018
Data Quality Analyst • IQIVIA

Personal Profile

I am driven by the desire to leverage data and technology to drive informed and data-driven decision making in the supply chain. With a strong background in data analysis and supply chain management, I am confident in my ability to turn data into actionable insights that support the optimization of supply chain operations. I am motivated by the challenge of finding creative solutions to complex problems and continuously improving performance. I am eager to bring my skills and experience to an organization and use my expertise in analytics and technology to drive positive change and help the organization reach new heights.

Employment History:

Company	Standard Bank Group
Period	24 April 2022 - To date
Job Title	Procurement Analytics Manager
Responsibilities: • Developing and implementing procurement analytics strategies and processes. • Analysing data to identify trends and potential cost savings opportunities. • Collaborating with cross-functional teams to ensure procurement data is effectively utilized. • Creating and presenting reports and dashboards to stakeholders. • Communicating with stakeholders on different initiatives being executed and pipeline work. • Monitoring key performance indicators and making recommendations for improvement. • Maintaining and monitoring data privacy policies and data security policies. • Monetizing data assets for the procurement function. • Ensuring data accuracy and completeness through regular audits and quality checks. • Developing and maintaining procurement analytics tools and systems. • Managing programs and project initiatives. • Designing and deploying reports. • Ensuring adoption of reports and new technology initiatives. • Drive the formulation of financial and statistical modelling analysis that will inform GVM&P strategy, policies, and best operating practices (considering international supply chain trends, local market developments, and regulations). • Research, evaluate and recommend new emerging technologies within the scope of my area. • Manage the team of reporting analysts. • Lead reporting and analytics team members in accordance with the Standard Bank management principles to support the organization's overall leadership focus on performance and talent management, values, management, and self-management practices. • Managing mentor and coach direct reports. • Present findings from reports to GVMP Leadership team on a continuous basis to inform decision making. • Evaluate Spend Analytics Reports produced by the operational analysts. • Plan, manage, control, and execute the delivery of periodic and Ad hoc reports. This includes the planning of timelines and distribution of resources. • Manage the quality of reports, identify risks and formulate mitigation strategies for GVM&P and recommend control procedures to mitigate risk. • Collaborate with IT and business stakeholders to prioritize and implement digital initiatives. • Produce reports/dashboards to provide to category managers. • Direct, manage and oversee daily analytics operations within an engagement, ensuring that junior employees and trainees meet deadlines and work efficiently. • Analyse the reports and provide input and guidance into recommendations for catalogue items.
