

Raffinage Chimie

Plateforme de La Mède

La Mède, February 23, 2018

Object: Recommendation letter

To whom it may concern:

M. Atef FERSI had been working for more than one year for Total refinery in my team until February 2018. He has accomplished an excellent work for his mission of preparation leader for works and maintenance on pipelines network for the whole site.

Atef has demonstrated very strong technical skills in the field of industrial piping as well as leaderships to deal with subcontractors and supervisors.

He is very autonomous, hard worker, and trustworthy. His experience is obvious in terms of safety, jobs planning set up, works reception (including financial negotiation with subcontractors) and team management.

I therefore strongly recommend Atef.

If I have another preparation project to handle in the future I will try to have him back for sure.

Minh-Hoang TRUONG
Construction Manager Piping

Albert CHICHA
Logistics Package Manager

Marcel SALOMON
Off-site & Utilities Package Manager
