- Multiple branch management.
- Field visit coordination.
- International Experience: Panamá, Colombia, USA, México, Guatemala, Rep. Dominican, Uganda, Malawi, Zambia, Nigeria, Jordan, Kenia, Angola, RD Congo, Afghanistan, South Africa, Tanzania, and more.

Work Experience

Seasoned Project Manager, Product Owner, Process Reengineering and Business Analyst expert with over two decades of experience managing government and private multi-lateral funded projects across the world.

My multi-cultural experience exceeds expectations as I have lived and worked in countries like **Uganda**, Malawi, Zambia, Tanzania, DRC Congo, South Africa, Nigeria, **Kenya**, Botswana, Congo, Namibia, Zimbabwe, Lesotho, Swaziland, Mozambique, and Angola in the African Region for more than 10 years; Afghanistan, Jordan in Asia for 8 months; and Panama, Colombia, USA, Guatemala, Nicaragua, Honduras, the Dominican Republic in America for more than 10 years.

Recently I have been responsible for the Oil & Gas retail systems, Cylinder Management System, Fleet System, Loyalty System, and Processes Reengineering in PUMA Energy in America and Africa. As a formalized subject matter expert (SME) I have steered the company's retail business into a more automated, efficient, and user-friendly environment whilst liaising between business, stakeholders and ICT excelling in stakeholder management.

Using Unified Modelling Language (UML ISO/IEC 19505-2:2012) expertise, I master all business processes, and documented them in a more associative way to align business and technology in a single platform.

In Angola, I led the analysis, development, business process reengineering, and implementation of the Oil & Gas System for the Republic of Angola for three consecutive years culminating with the implementation of the "Sistema Integral de Petroleo y Gas (SIPG)" in Angola's oil exploitation and exploration areas (Soyo, Cabinda, and Luanda).

Nov. 2019
Current

Current – Africa ICT Regional Retail Lead – Lusaka, Zambia

Previous–Regional Retail Senior Business Analyst/SME - Panama

America: To align QSR & Forecourts retail business requirements to systems to be implemented whilst building UML analysis packages. In the Project Management role, I have been managing weekly status reports whilst organizing tasks, budget, milestones, and deliverables throughout the American region, providing support to the African Region, and aligning system interfaces to business requirements. Managing Loyalty systems, requirements, and integrations to position campaigns in a competitive market.

In Africa I lead and pioneered the “Rural Station” a mobile container with every part a petrol station requires to be safe, efficient, and operational.
