Professional qualification: Mechanical engineer

Profile

Experienced mechanical engineer with a demonstrated history of working as Retail Director in the oil & energy downstream industry. Skilled in negotiation, retail operating management, assets distribution plants, business planning, budgeting, M&A, sales, and team building and management. Successful business development professional with a strong technical and commercial background.

I have built up a great multi-functional team in international environment leading it through several transformations we are currently facing in our industry and taking the opportunity to develop new sustainable business. I really enjoy developing people skills for giving them same chance I had during my career.

Work experience

07/2021 – present
Lyon, France

Head of retail business unit Eni France Sarl

I am responsible for leading and developing the position of Eni retail business in the French market both from sales & marketing and operational perspective. I am in charge of thinking the retail long-term strategy. I lead through my direct managers, retail operations, investments and maintenance, development of highway and dodo points of sale, fuels cards sales, marketing, pricing and back-office. There are 30 direct employees all over the retail business unit and I lead about 1,000 indirect employees who work in the points of sale.

The assets distribution network consists of codo and dodo points of sale offering multiple services such as restaurants, coffee corner, non-fuel retail outlets, convenience stores, car-washes and car repairs. The business that I manage in a few figures:

- 152 points of sale, 38 of them in the motorway
- 300,000 of cubic meters of fuels sold
- 80 millions of euro non-fuel turnover
- 13 millions of euro the adjusted operated income.

01/2017 – 06/2021
Lyon, France

Head of sales & retail operations Eni France Sarl

In 2016 my previous company proposed me to get back in the company in a foreign branch. It was a great occasion that I didn't miss. In the French branch I was in charge of managing sales and the operations of the retail points of sale leading the area managers and category managers, with the primary mission to:

- directs all retail sales profit centers across France.
- Ensures extraction of maximum value out of assets distribution portfolio.
- Delivers strategy via financial analysis to drive economic development of profit centers.
- Leads national area managers team of retail and non-fuel category managers.
- Integrates fuel and non-fuel commercial strategies, ensuring national implementation across multiple teams.
- Develops and grows fuel product volumes and margins across dealer partners, fleet cards customers, products and services in the retail outlets.
- Contributes to bottom-line national revenue goals via P&L and economic analysis against tight financial deadlines.
- Negotiates commercial agreements with partners.

Work experience

01/2015 – 12/2016
Palermo, Italy

Mechanical design engineer oil & energy Own engineering firm

At the end of 2014 I quit my job. For a short period of time I lived in London and I have been on other things. Back in Italy I decided to establish my own engineering firm to built up my profession. I was in charge of:

- deliver strategic investment decisions regarding M&A of fuel distribution assets.
- Design oil & gas distribution plants: fuel depots and service-stations.
- Design fire prevention systems in the petrochemical.
- Construction management and project management.
- Technical and commercial consultancies on behalf of the Court of Palermo in a LPG gas cylinders filling factory.

06/2012 – 09/2014
Rome, Italy

Regional retail manager for assets distribution network Eni SpA R&M Division

I was in charge to manage sales and operations of the assets distribution network in the region.

I managed a team of local sales managers and non-fuel category managers. My activity consisted in:

- implementing sales and marketing business strategies.
- Negotiate commercial agreements with partners DODO.
- To make business plans and economic evaluations for new business opportunities.
- Deliver on agreed performance measures KPIs and target setting processes.
- Manage operating, maintenance and sales budget.
